

Hideaway Subwoofers on the Cheap

The beauty of in-wall subwoofers is that they "disappear" in your wall. The downside is they can be pretty expensive. Recognizing this, AudioSource has introduced the affordable AS Series. You can choose between the AS8SW, featuring an 8-inch driver in a 10x10-inch frame, and the AS10SW, with a 10-inch driver in a 12x12-inch frame; rated power handling is 100 and 150 watts, respectively.

AudioSource • \$130-\$170 • audiosource.net

FLASH:

In-wall subwoofers can add tremendous impact to the home theater experience without consuming valuable floor space.
